

## Power BI Setup Guide

### System Requirements:

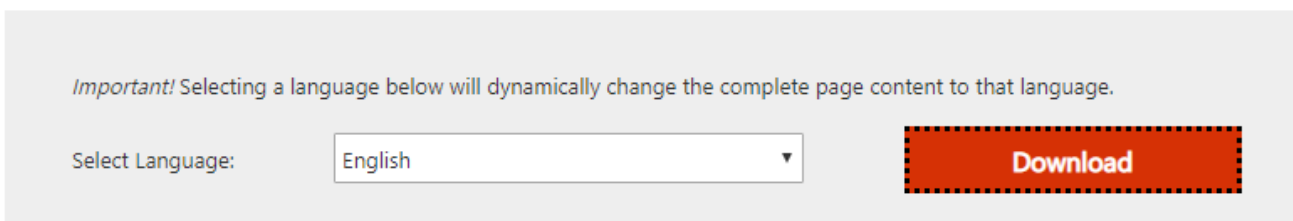

**Hardware:** 8GB RAM, 20GB HDD

Step-1 Disconnect from your EY network and use personal hotspot to download the Power BI Since Ey Network Don't allow you to Download.

And then go to the [link: https://www.microsoft.com/en-us/download/details.aspx?id=58494](https://www.microsoft.com/en-us/download/details.aspx?id=58494)

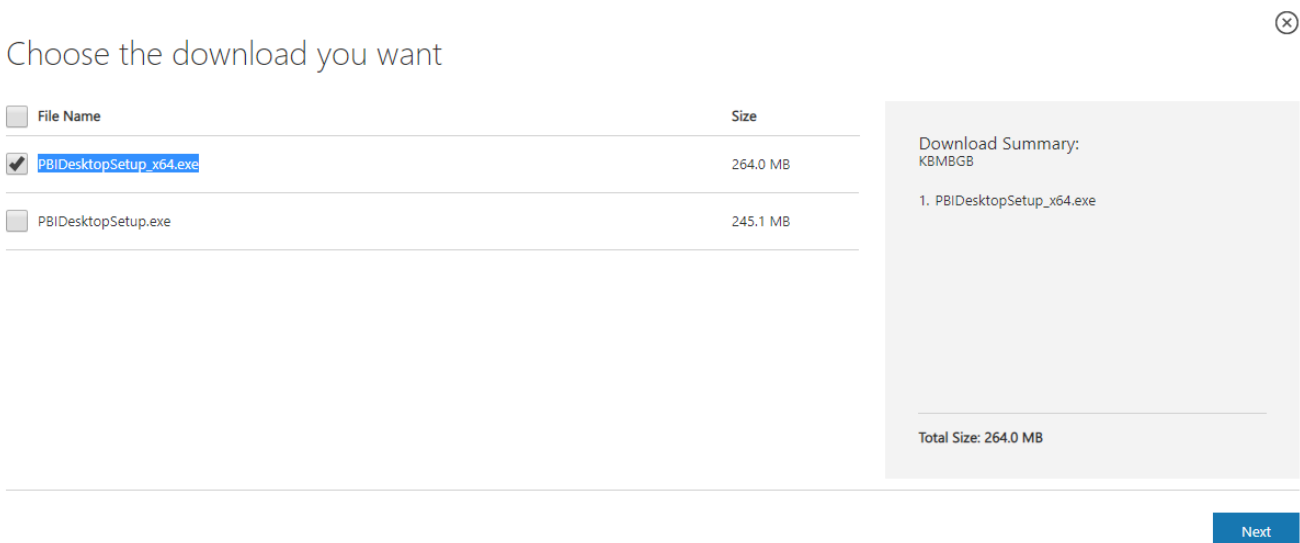

**Step-2: Press the Download Button as mentioned in below image**

### Microsoft Power BI Desktop

**Step-3: Tick mark the "PBIDesktopSetup\_x64.exe" File Name**

**Just follow the on-screen instructions**

**Press the "Next" Button and download the "exe" file in your system**

**Installation Completed Successfully!**
